

Implement of GPS Location Status Checking

GPS Clocking

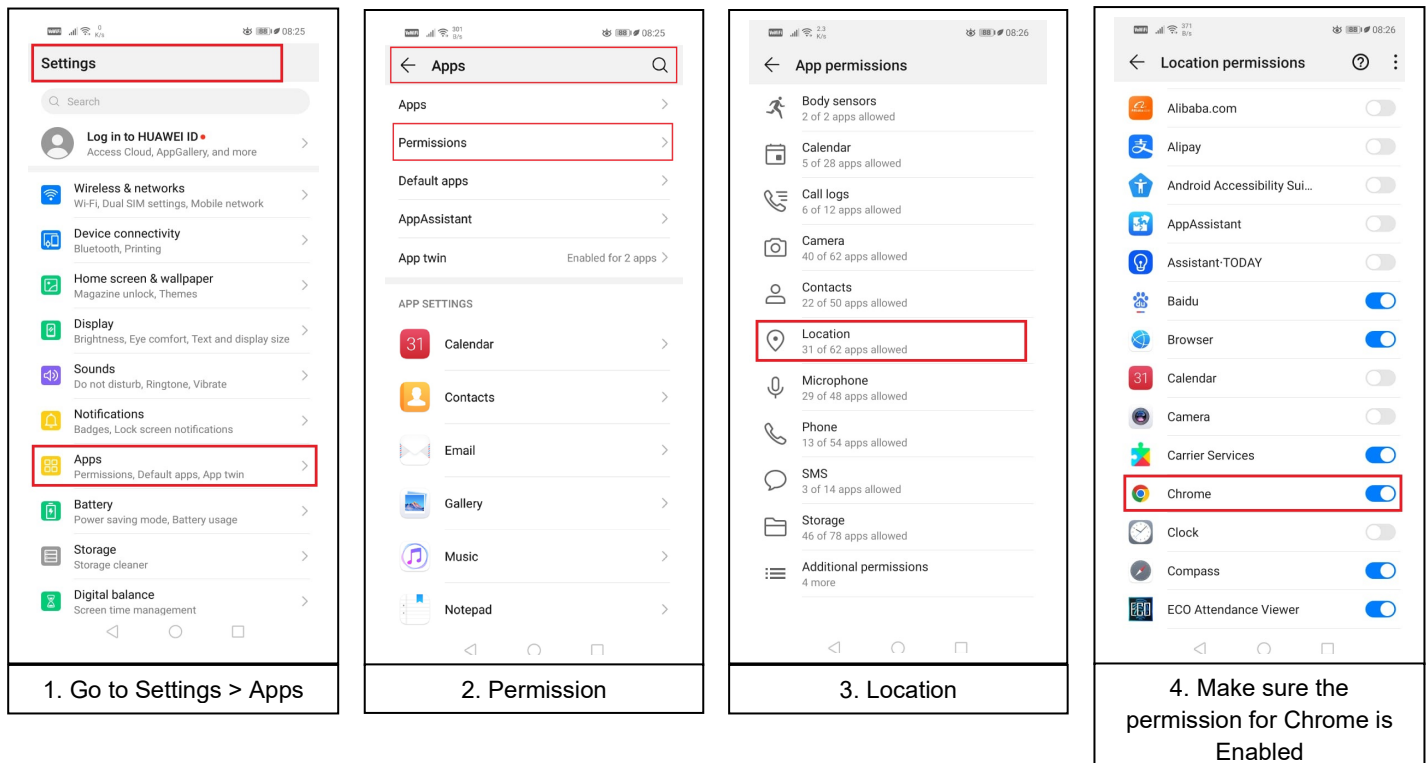

If the "Ensure GPS location is set to on" message appear during GPS Clocking, indicate that phone/device location permissions have been turned off.

Solution 1: Enable Permission of GPS Location

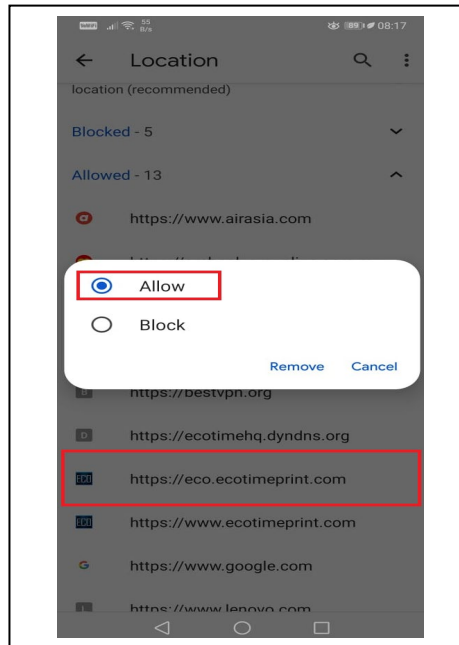

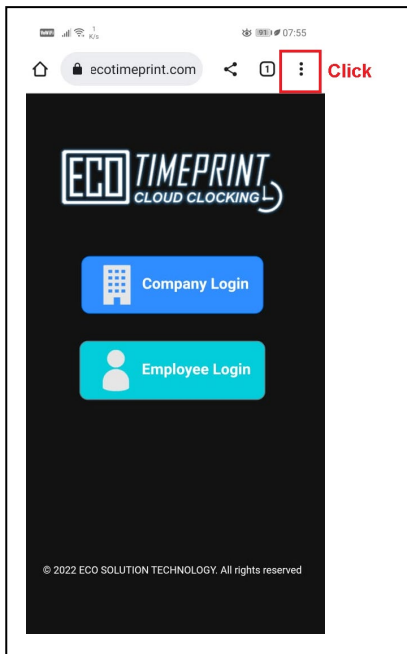

For Android Google Chrome:

Step 1: Enable Google Chrome Location Permission

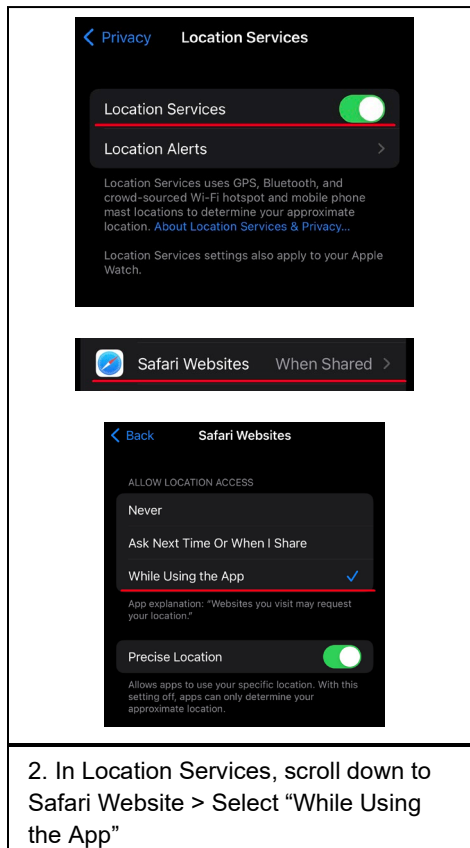

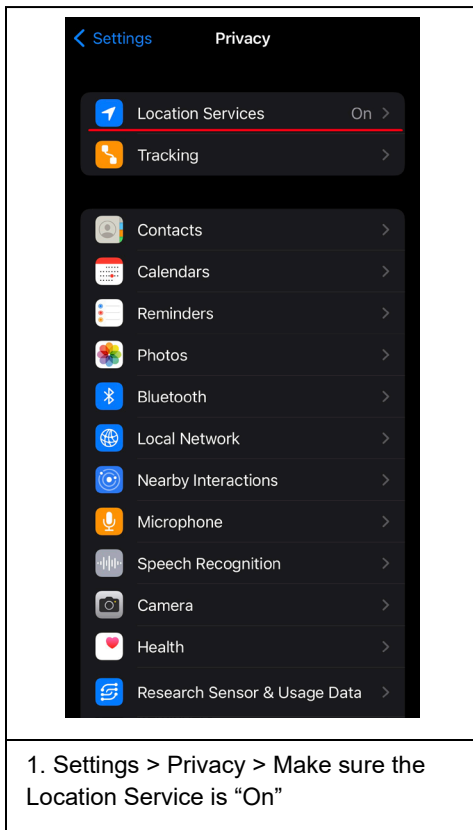

Step 2: Enable Google Chrome Website Location Permission

Go to Chrome **Menu** > Scroll down to **Settings** > Scroll down to **Site Setting** > **Location** > Scroll down to <https://eco.ecotimeprint.com>, ensure the page is **Allow**

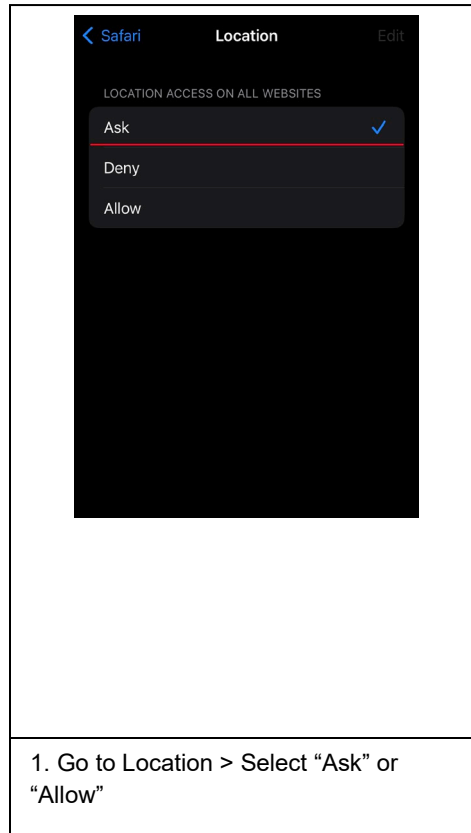

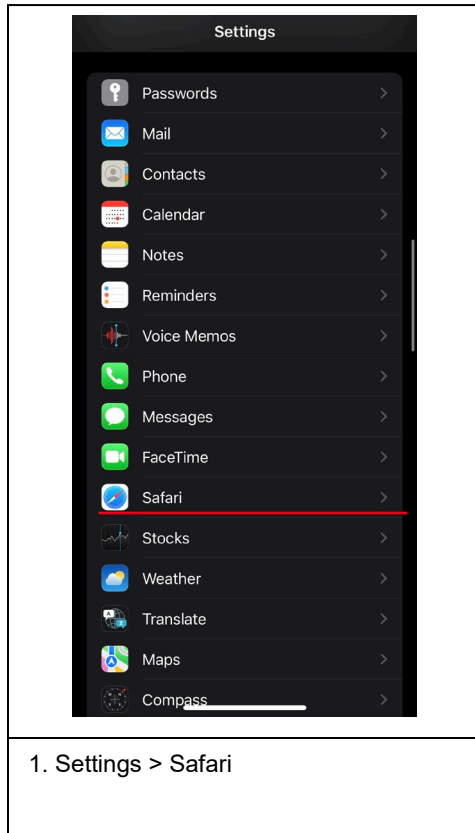

For IOS Safari

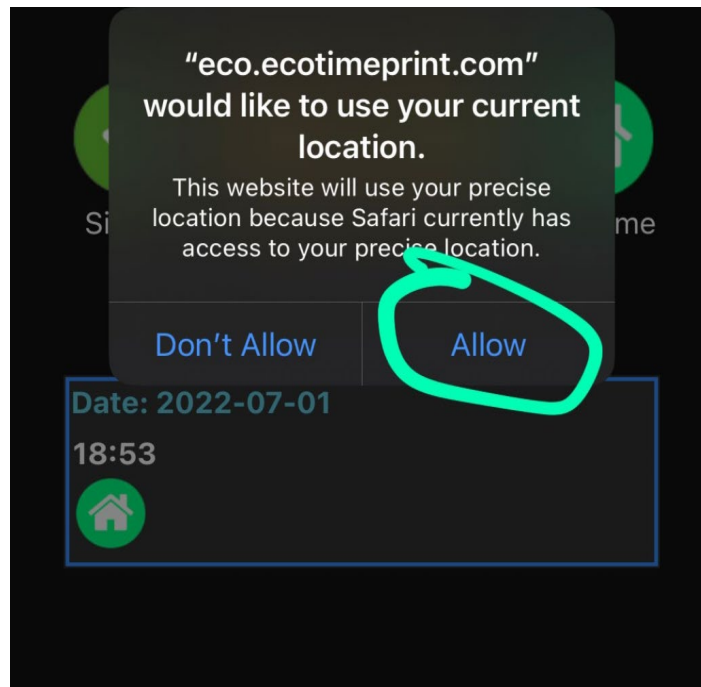

STEP 1: Go to **Setting** > Scroll down to **Privacy** > Scroll down to **Location Service** > Make sure service is turned on, and **safari** is turned on to **“While Using the App”**

STEP 2: Go to **Setting** > Scroll down to **Safari** > Scroll down to **Location** > Make sure either **“ask”** or **“allow”** is selected

STEP 3: Click **“Allow”** if the browser request the permission to get current location

Solution 2: Turn off GPS Location Checking

Login to “Company” > “Menu” > “Employee Parameter” > Scroll down to the Employee > Set GPS

Location to Off
